Here's what's new with Ariya and Arisa DeVine...

April 2014

Tunwah has the chicken pox, but is on his way to a speedy recovery! It started about two weeks ago; he started having a fever and small red bumps appeared first on his arms, face, and then spread all over his body. We got some cream and medicine from a doctor, and have been taking special care of him. We prayed over him, and already, his bumps are starting to clear and he no longer has a fever! **We believe that he will be completely healed very soon and we thank God every day that he is able to be with us.**

David and Tunwah are now out of school and are on their summer break. But, without any type of schedule planned out for them, they are restless! They both have so much energy and are constantly running around the house.

So together, we came up with a plan.

We've started a summer break schedule, which is similar to summer school. Every day, we teach the boys educational things and play games with them. The activities will include: reading, writing, English, math, Thai, coloring, drawing, arts & crafts, P.E. (sports), thinking games, cleaning, cooking and music.

We have already started with some of these activities, and the boys love it! We have lots of fun going through the subjects, and they enjoy learning new things. We will still continue to use this schedule in the future, even when the boys are back in school.

Children have the capability to learn so many things. We should never underestimate the minds of our kids. **We enjoy seeing what David and Tunwah are capable of!** We thank you so much for your support and prayers.

**May God bless you abundantly,
Ariya and Arisa DeVine**
